// HELLO

As a software engineer with a background in Business Development and Project Management, I build elegant solutions to common and uncommon problems with a focus on intuitive, user-friendly resolutions.

I specialize in bringing a calm to the storm of business with my years of experience in process improvement, problem-solving, and client-first solutions.

// SKILLS

Frameworks & Languages: MERN stack, React, Node.js, Express, Flask, javascript, jQuery, CSS, HTML, Python, AJAX, Bootstrap, RESTful API, Bcrypt

Management & Deployment: Git, Github, Heroku, Command Line

Databases: MongoDB, Mongo Atlas, SQL, PostgreSQL

Methodologies: Object Oriented Programming, MVC Pattern, Test-Driven Development, Responsive Design, Authentication, User Stories, Wireframing

Other Skills: Full-stack development, Adobe Creative Suite certified, Wordpress CMS, Microsoft Office Suite, CRM/ERP platforms, problem solving, & customer service

// PROJECTS

Several full stack applications created as a full time immersive student at General Assembly's Software Engineering program that included over 500 hours of professional training. Built both server-side and client-side rendering apps, used modern platforms like React, Node.js, SQL, MongoDB. Utilized a hands-on approach to practice modern development methods, critical thinking skills, team collaboration, and industry best practices. Developed a portfolio of individually and collaboratively focused in-class projects.
